# Tree Planting Area

Just down from the start of the Saddle Trail on SE 15th St., which is in the Dawncrest Neighborhood off of Regner Rd., we planted 400 bare root trees in an area where invasive blackberries have been cut.

Here is a photo of an area **before** cutting blackberry canes.

Here it is **after** planting in the same area.

**Before**, with partial cutting.

**After**, with planting, although trees won't show for another year or two, but the clearing is still impressive.

# Work ahead ~ Follow-up

Keeping the Himalayan Blackberries at bay

~ digging out their root crowns

~ cutting back their canes

Protecting the young plants from drought

~ mulching

~ watering

End of slides
